

## Before your **MVA clients** walk through the door to court, send them through **our assessment door first.**

Here's why. JVS Toronto Vocational and Psycho-Vocational Assessment Services provide professional accredited services to help you and your client recover damages for injuries and losses sustained in motor vehicle or other accidents. Use us to:

- establish if an occupational disability exists
- receive standardized test results and a professional file review that provides:
  - current employment potential compared to previously held employment and related income loss
  - determination of areas of strength and barriers to success
  - broad assessment of client's post-MVA performance in areas impacting on occupational success, including cognitive, academic, vocational and mental health functioning
- receive a cost determination for educational and training steps as part of a go-forward plan for the injured party

When experience matters, JVS Toronto Vocational and Psycho-Vocational Services delivers – to personal injury lawyers, insurance companies, Psycho-Vocational clients and to funders such as Ontario Works and Employment Ontario.

Jewish Vocational Service – serving employers in the GTA for over 60 years
